**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I: Claims 1-8 and 11-25** are drawn to communications for determining authorizations to view a broadcasted signal sent over a network, classified in **class 726, subclass 21**.

**Group II: Claims 9-10 and 26** are drawn to protecting use of software or data that is stored on and read from a physical medium, classified in **class 726, subclass 34**.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not include the specific limitations of the apparatus/method of Group II. Specifically, Group I does not include the steps of protecting data that is transmitted, separately from a network, by a physical medium. Therefore, the two groups of claims are not directed to a product and a process of use of said product. See 37 CFR 1.475.
